1U Rackmount Kit for Firewalla Gold Pro Assembly Manual

Disclaimer:

At Bartallama3D we regularly update our assembly manuals to improve the assembly of our products and ensure customers have a good experience. If you have any questions about the assembly of your unit please feel free to email us at hello@Bartallama3D.design. We are happy to provide assembly guidance or answer any questions. Previous customer feedback has helped us improve our products and documentation.

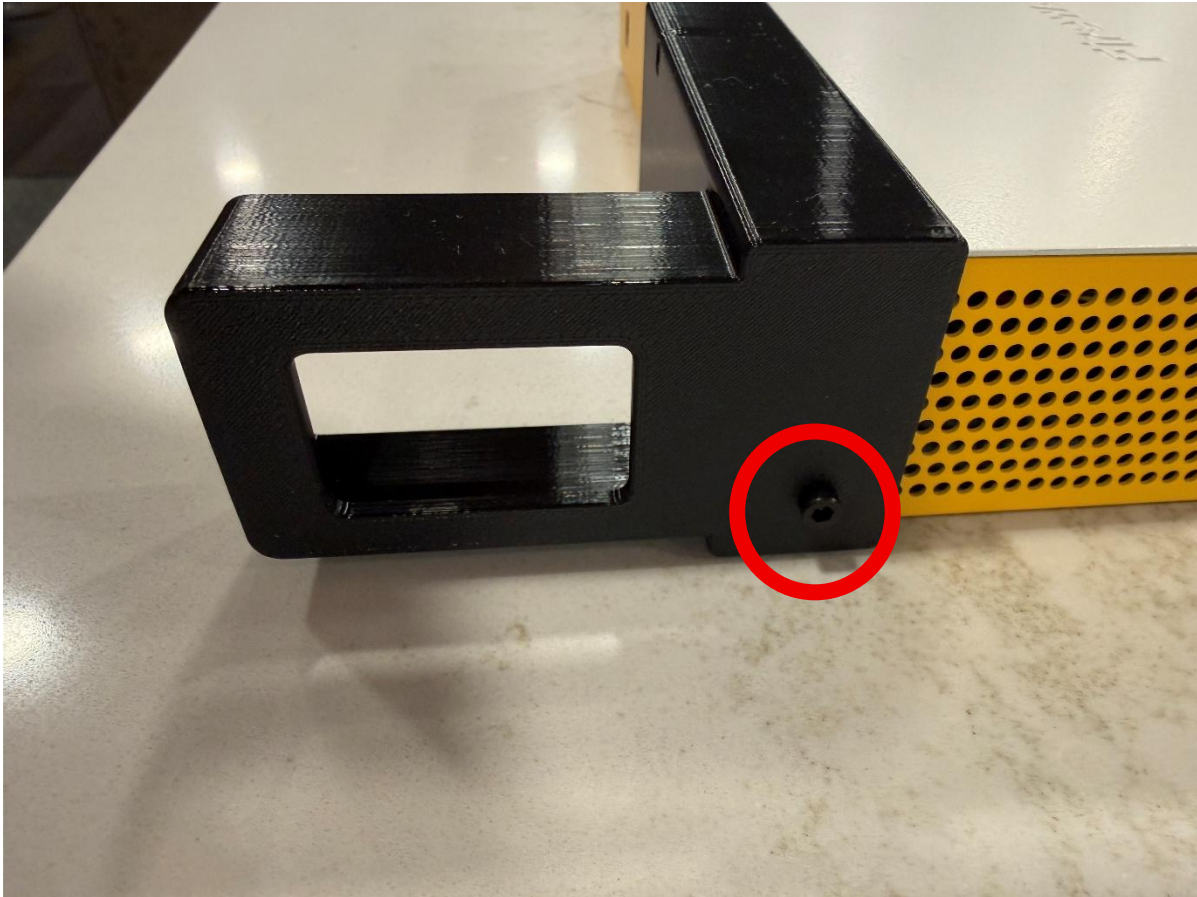

Step 1: Attach Steel rack ears using 4 screws on each side. Rack ears are labeled “L/R”. Ensure “Bottom” text is facing upwards when installing rack ears.

Step 2: Install Keystone/Keystone blanks

Step 3: Install Power Brick holder using 1 screw to attach it in place. The holder slips over the top and bottom of the device and the screw attaches to the threaded hole in this location.

Step 4: Insert power brick with IEC plug facing out the hole in the power brick holder. Thread power cord through the power brick clamp. Screw power brick clamp into 2 threaded inserts to hold power brick in place.
